

MY SQL ASSIGNMENT

Data set used: DEPARTMENT, EMPLOYEE, COMPANY

1. Query all rows from Department table

SQL

```
SELECT * FROM DEPARTMENT;
```

2. Change the name of department with id = 1 to 'Management'?

SQL

```
UPDATE DEPARTMENT SET NAME = "Management" WHERE ID = 1;
```

3. Delete employees with salary greater than 100000?

SQL

```
DELETE FROM EMPLOYEE WHERE SALARY > 100000;
```

4. Query the names of companies?

SQL

```
SELECT NAME FROM COMPANY;
```

5. Query the name and city of every employee?

SQL

```
SELECT NAME,CITY FROM EMPLOYEE;
```

6. Query all companies with revenue greater than 5000000?

SQL

```
SELECT NAME,REVENUE FROM COMPANY  
WHERE REVENUE > 5000000;
```

7. Query all companies with revenue smaller than 5000000?

SQL

```
SELECT NAME,REVENUE FROM COMPANY  
WHERE REVENUE < 5000000;
```

8. Query all companies with revenue smaller than 5000000, but you cannot use the '<' operator?

SQL

```
SELECT NAME FROM COMPANY WHERE NOT REVENUE >= 5000000;
```

9. Query all employees with salary greater than 50000 and smaller than 70000?

SQL

```
SELECT NAME FROM EMPLOYEE WHERE SALARY BETWEEN 50000  
AND 70000;
```

10. Query all employees with salary greater than 50000 and smaller than 70000, but you cannot use BETWEEN?

SQL

```
SELECT NAME, SALARY FROM EMPLOYEE  
WHERE SALARY >= 50000 AND SALARY <= 70000;
```

11. Query all employees with salary equal to 80000?

SQL

```
SELECT NAME, SALARY FROM COMPANY WHERE SALARY = 80000;
```

12. Query all employees with salary not equal to 80000?

SQL

```
SELECT NAME FROM EMPLOYEE WHERE SALARY <> 80000 ;
```

13. Query all departments (each name only once)?

SQL

```
SELECT DISTINCT NAME FROM DEPARTMENT;
```

14. Query all names of employees with salary greater than 70000 together with employees who work on the 'IT' department.

SQL

```
SELECT A.NAME, B.NAME FROM EMPLOYEE A RIGHT JOIN DEPARTMENT B  
ON A.DEPARTMENT_ID = B.ID  
WHERE SALARY >= 70000 AND DEPARTMENT_ID = 3;
```

15. Query names of all employees together with id of department and name of department they work in, but you cannot use JOIN?

SQL

```
SELECT A.NAME, B.ID, B.NAME FROM EMPLOYEE A , DEPARTMENT B  
WHERE A.DEPARTMENT_ID = B.ID;
```

16. Query all employees, city that work in city that starts with 'L'?

SQL

```
SELECT NAME,CITY FROM EMPLOYEE WHERE CITY LIKE "L%";
```

17. Query all employees, city that work in city that starts with 'L' or ends with 'S'?

SQL

```
SELECT NAME,CITY FROM EMPLOYEE WHERE CITY LIKE "L%" OR  
CITY LIKE "%S";
```

18. Query all employees, city that work in city with 'O' somewhere in the middle ?

SQL

```
SELECT NAME,CITY FROM EMPLOYEE WHERE CITY LIKE "%O%";
```

19. Query names of all employees together with id of department they work in, using JOIN

SQL

```
SELECT A.NAME,B.ID,B.NAME FROM EMPLOYEE A INNER JOIN  
DEPARTMENT B ON A.DEPARTMENT_ID = B.ID;
```

20. Query name of every company together with every department?

SQL

```
SELECT A.NAME,B.NAME FROM COMPANY A JOIN DEPARTMENT B;
```

21. Query employee name together with the department name that they are not working?

SQL

```
SELECT A.NAME,B.NAME FROM EMPLOYEE A , DEPARTMENT B WHERE  
A.DEPARTMENT_ID <> B.ID ;
```

22. Query name of every company together with departments without the 'Support' department?

SQL

```
SELECT A.NAME,B.NAME FROM COMPANY A JOIN DEPARTMENT B  
WHERE B.NAME NOT IN ("SUPPORT");
```

23. Query names of every company and change the name of column to 'Company'?

SQL

```
SELECT NAME AS COMPANY FROM COMPANY;
```

24. Query the city wise salary?

SQL

```
SELECT CITY,SUM(SALARY) AS SLRY FROM EMPLOYEE GROUP BY CITY;
```

25. Query the highest revenue company name?

SQL

```
SELECT NAME FROM COMPANY ORDER BY REVENUE DESC LIMIT 1;
```

26. Query company name together with other companies names#LIKE:GOOGLE Apple, GOOGLE IBM, Apple IBM

SQL

```
SELECT A.NAME,B.NAME FROM COMPANY A, COMPANY B  
WHERE A.NAME <> B.NAME;
```
